5+ Years of Experience

15+ Completed Projects

$> whoami

- I can take any idea to its full implementation and final release.
- Very proactive person, always looking forward to improve the team and myself.
- Quick, passionate learner who successfully collaborated remotely to create excellent products.
- Lately, I've been getting into bug bounties, securing contracts and DeFi developments.

Education

Software Engineer
UNLAM University

Teamworking

My main objective is to be part of a professional team, in which the achievements and successes of each one are recognized in an optimal and pleasant work environment.

Services

Blockchain

I build awesome dApps and Contracts using Solidity and JavaScript on different EVM chains. DeFi for a decentralized future.

`OpenZeppelin Contracts / Web3 / Hardhat / Foundry / Solidity / Remix IDE / Ethers / Infura / TheGraph`

Backend

I build and maintain servers and databases using TDD quickly and efficiently.

`Node.js / Express / Ruby / PostgreSQL / MySQL / MongoDB / Postman / Docker`

Frontend

I know how to make products super user friendly. I am very aware of how vital UX is to a product's success.

`React / Next.js / Tailwind CSS / React Native / Styled Components / Vercel`

Clean Code

Rushed jobs and unclean code always result in future bugs and missed deadlines. I never rush a job. Clean code forever.

Skills

Spanish	English	C-Lang
100%	65%	100%

Solidity	100%
Hardhat / Foundry	100%
JavaScript / TypeScript	100%
Java	75%
Ruby	90%
React JS / Next JS	100%
Node JS	100%
React Native	65%
Tenderly / Etherscan	65%

Work History

Main Developer
Maxos

Sep 2023 - Present
Boston Area

Led development of multiple DeFi and Web3 products including launchpads, trading interfaces, funding, and lending protocols. Built Stak (launchpad for DATs/SPACs/ICOs), Vibestation (AI-powered DeFi trading UI), DagSwap (Uniswap v3 fork for BlockDAG), Taiser (tweet-based VC funding protocol), and Sweep (lending protocol with cross-chain LayerZero integration and audited smart contracts).

Main Developer
ALLY

Jan 2021 - Sep 2023
Boston Area

We are -buidling- DeFi protocols on the AVM. Ally is a tool that takes care of committing and voting to Algorand's governance by dividing the TVL into Vaults to allow redemptions without losing rewards.

Full Stack Developer
Sonder

Jul 2019 - Dec 2020
San Francisco Bay Area

Created a gamified e-commerce platform for B2B interactions. Used the Ethereum blockchain to do escrow, to negotiate prices and to secure transactions.

Main Developer
Ridges

Dec 2018 - May 2019
Buenos Aires

Developed an Android application that connected to a medical external device to operate it. The controlled device executed a cryolipolysis treatment on patients.

Junior Developer
Cien Radios

Jun 2018 - Dec 2018
Buenos Aires

Developed a -spotify like- website and a mobile app to stream music. They were built on ReactJS and ReactNative respectively. We used the Deezer API as the backend.

Junior Developer
Honky Tonk

Oct 2016 - May 2018
Buenos Aires

Developed and maintained a small website for the store.
